

Configuring NAT Network for Virtual Machines

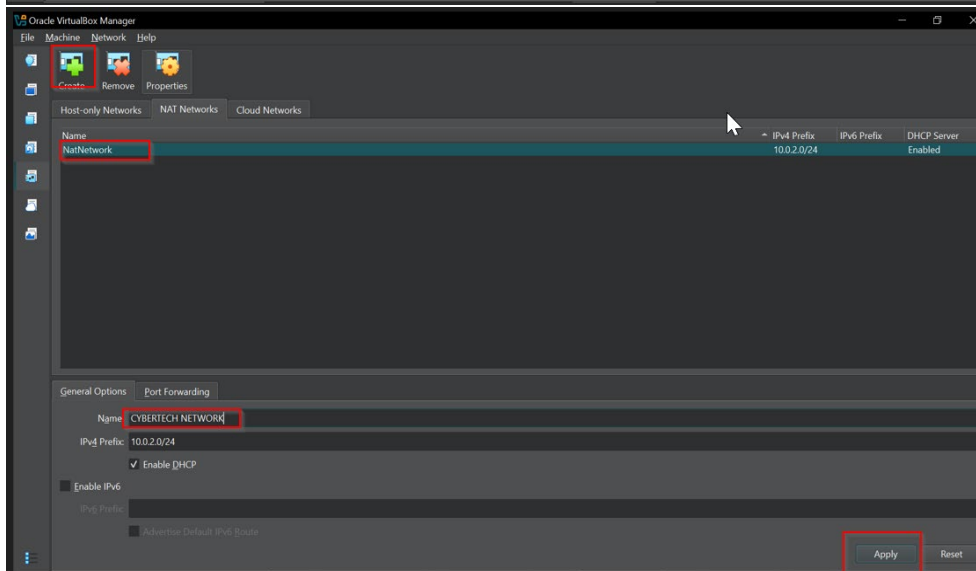

1. Navigate to the File menu in the top-left corner.

2. Select Tools, then go to Network.

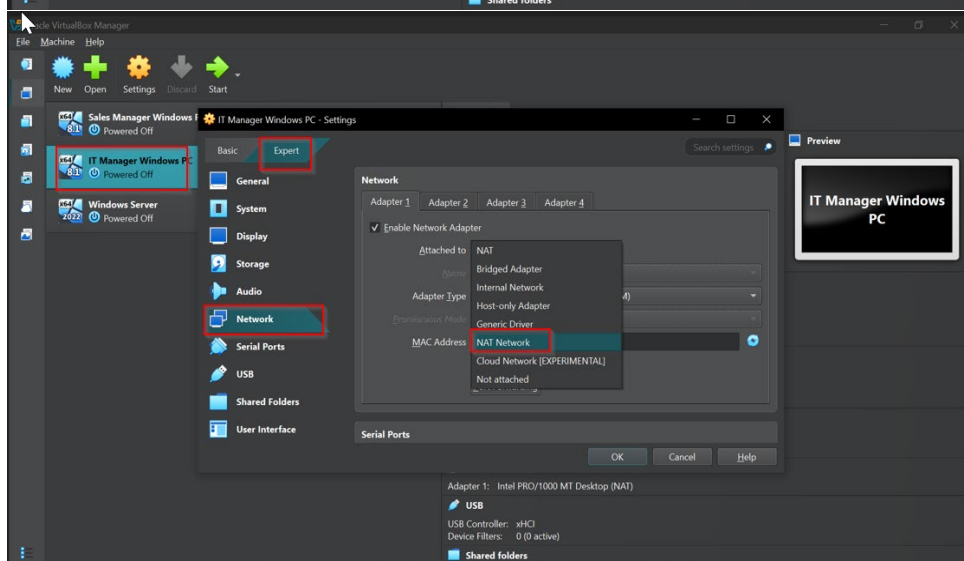

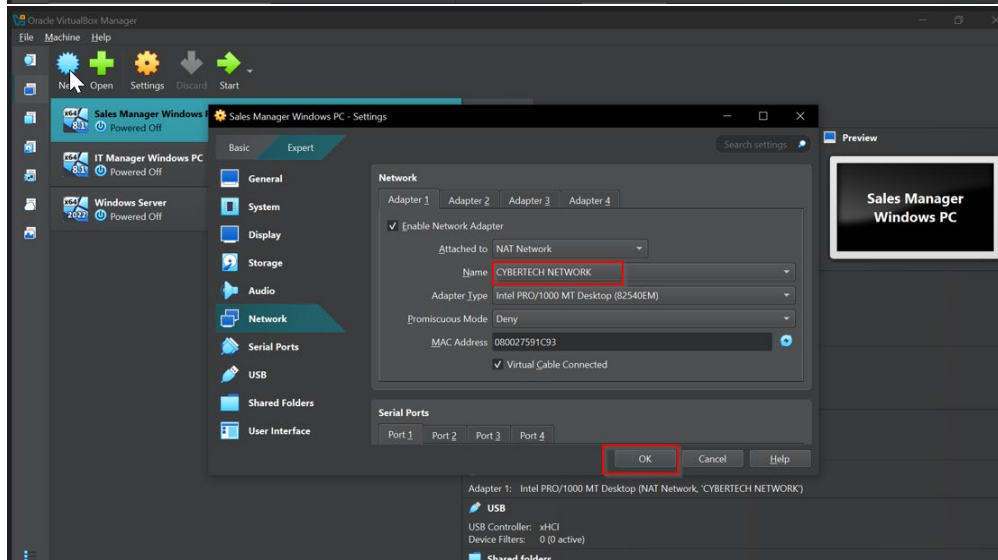

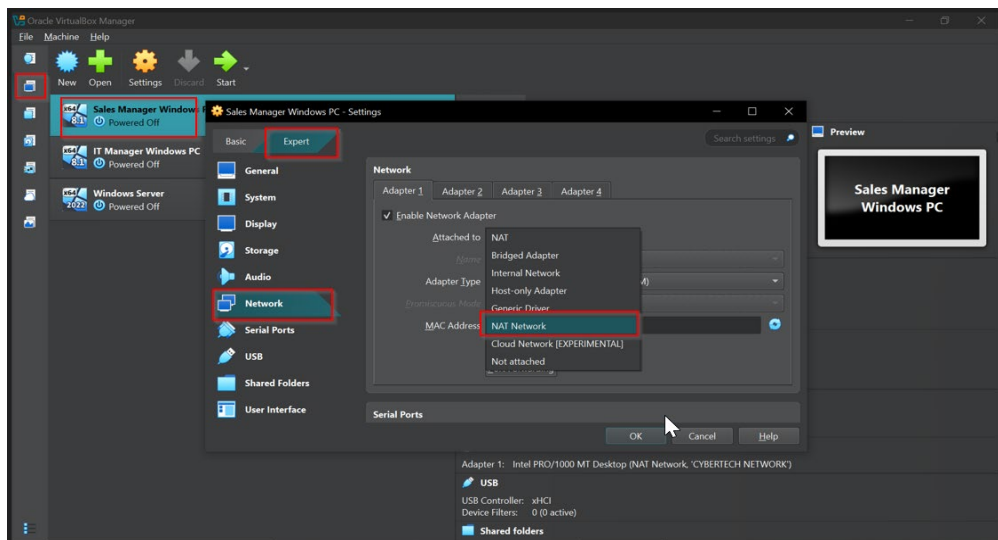

3. In the Network section, choose NATNetworks.

4. Click Create to generate a new NATNetwork.

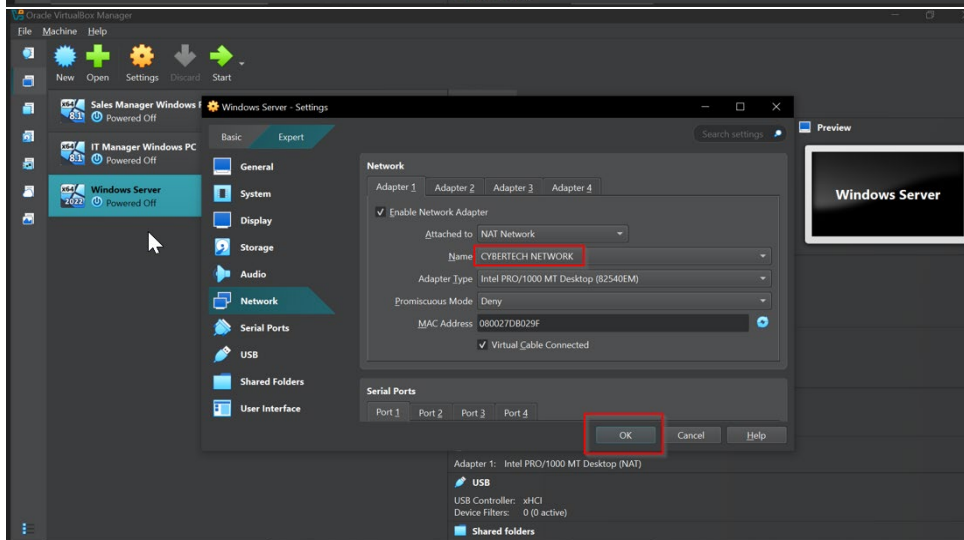

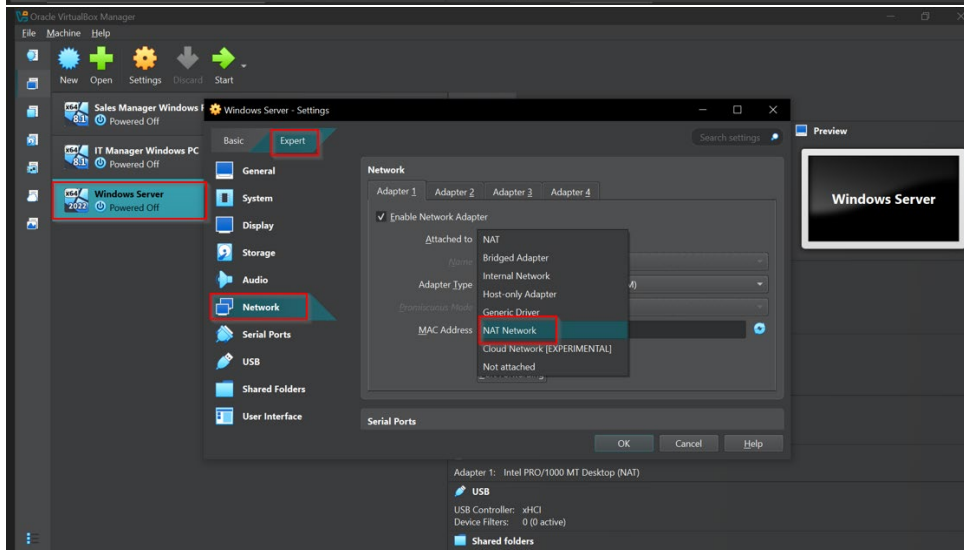

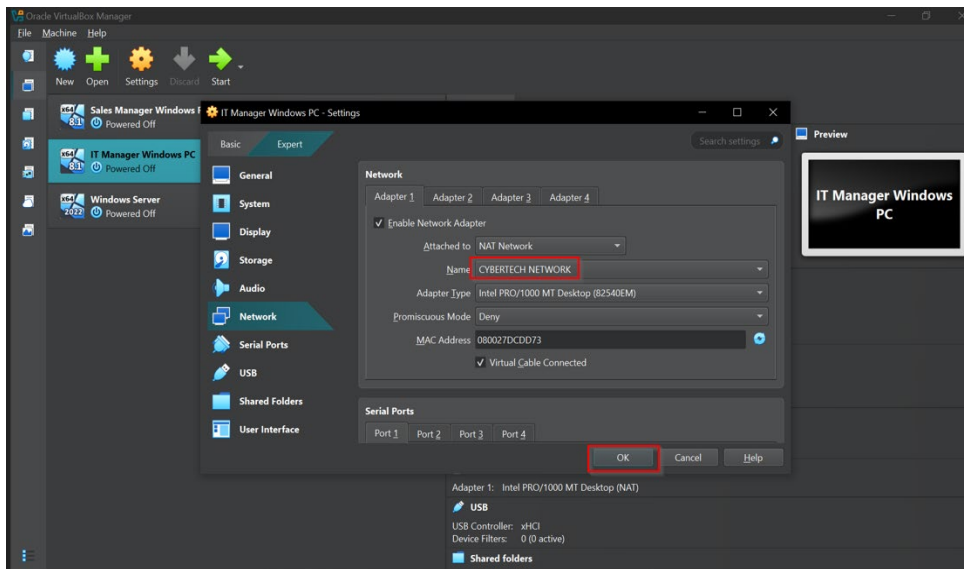

5. Rename the newly created network from "NatNetwork" to CYBERTECH NETWORK.

6. Click Apply to save the changes.

1. Click the Machine icon (just below the Home icon) to view available virtual machines.
2. Select the Sales Manager Windows PC
3. Ensure you are in Expert Mode.
4. Go to the Network tab.
5. In the “Attached” field, dropdown and select NAT Network
6. Once selected, the CYBERTECH NETWORK should automatically appear in the Name field.
7. Click ‘OK’ to apply the network configuration.

- Assign CYBERTECH NETWORK to IT Manager Windows PC

Assign
CYBERTECH
NETWORK to
Windows Server
