

1. Search for the Windows 8 download on Google.
2. Click the official Microsoft download link shown in the first result.

3. Select the 64-bit Windows 8 ISO from the drop-down list on the download page.

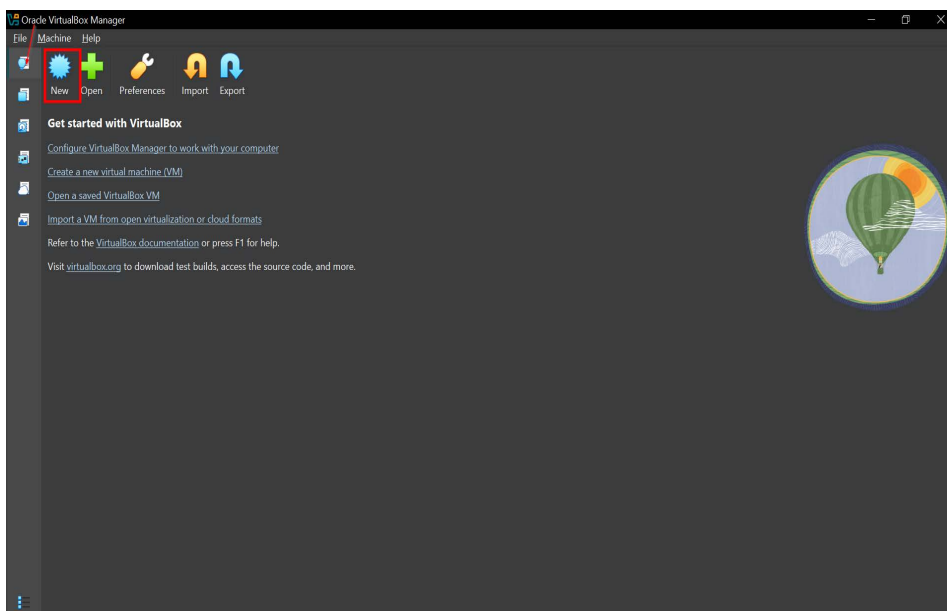

4. The download will start automatically, and your browser will indicate progress.

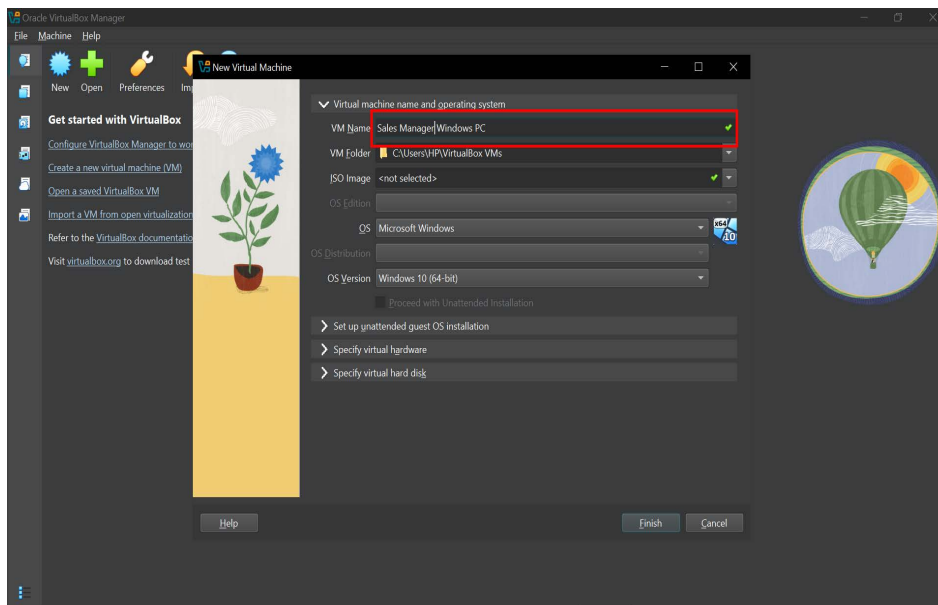

5. Open File Explorer and go to your Downloads folder to confirm the ISO file has been downloaded successfully.

6. Open Oracle VM VirtualBox Manager from your Start menu or desktop.

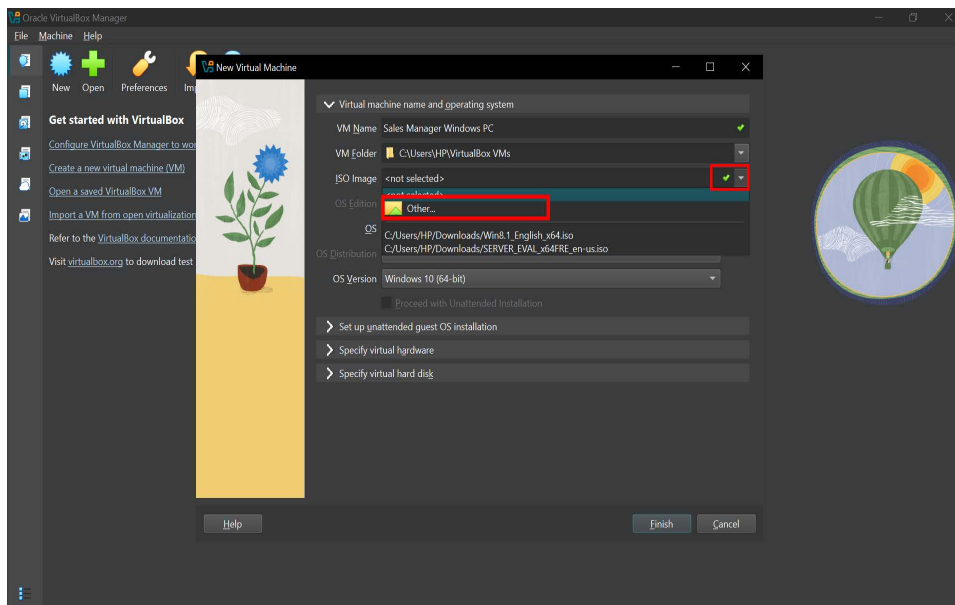

7. On the VirtualBox home screen, click “New” to create a new virtual machine.

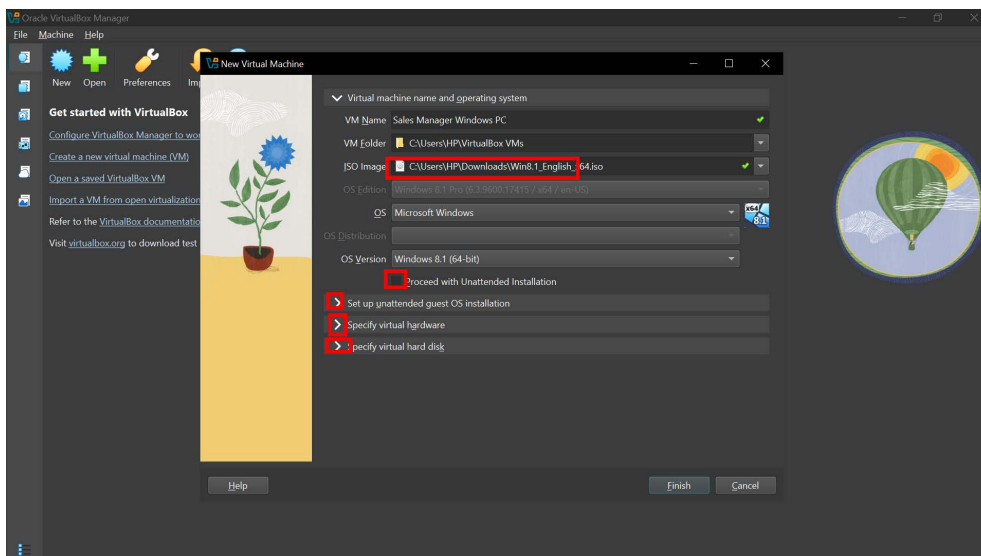

8. Name your virtual machine - in this case, Sales Manager Windows PC.

9. Leave the default VM folder path unchanged

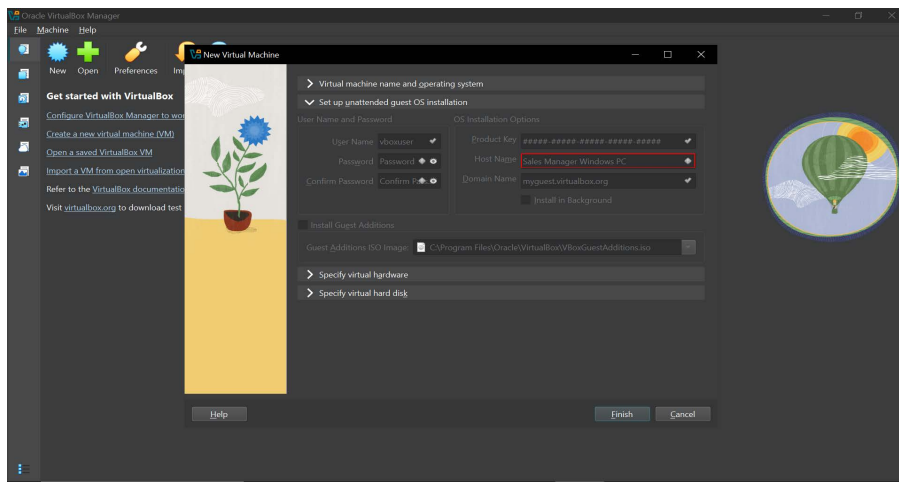

10. In the ISO Image section, click the drop-down arrow and select “Other...”.

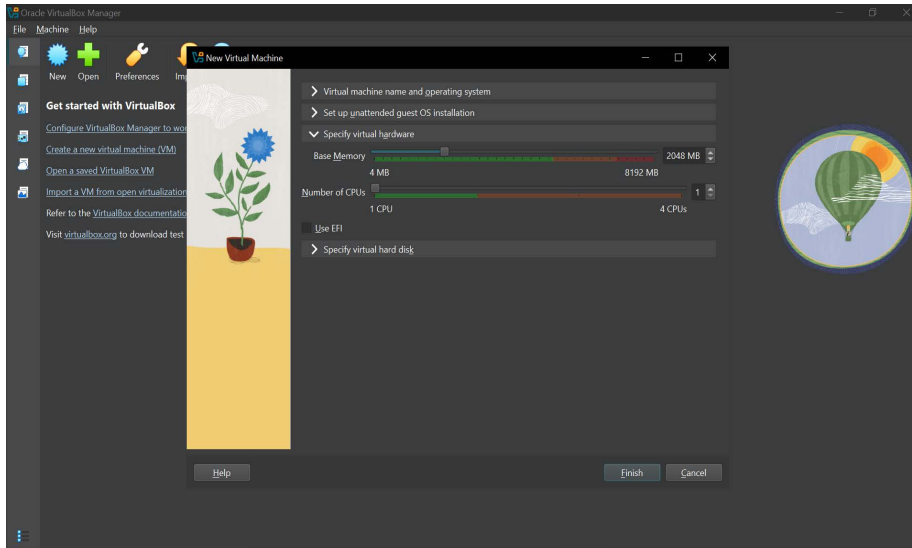

11. Navigate to your Downloads folder and select the previously downloaded Windows 8 ISO file.

12. Uncheck “Proceed with Unattended Installation.”

13. Do a drop down for each of the arrows below

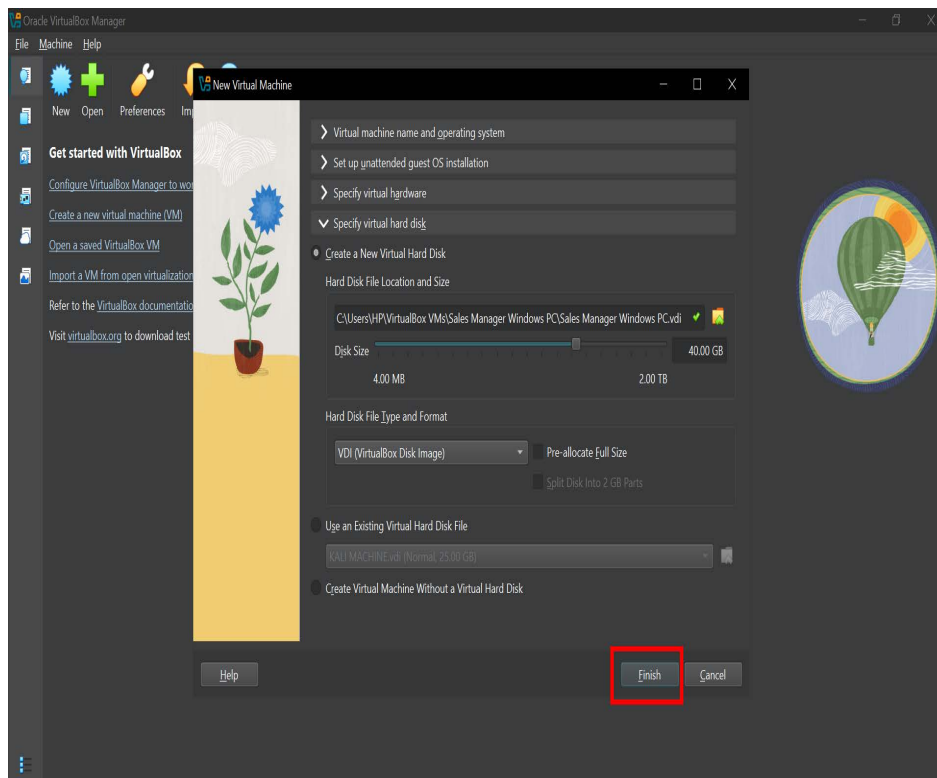

From the drop down "Set up unattended guest OS installation" ... Don't make any changes

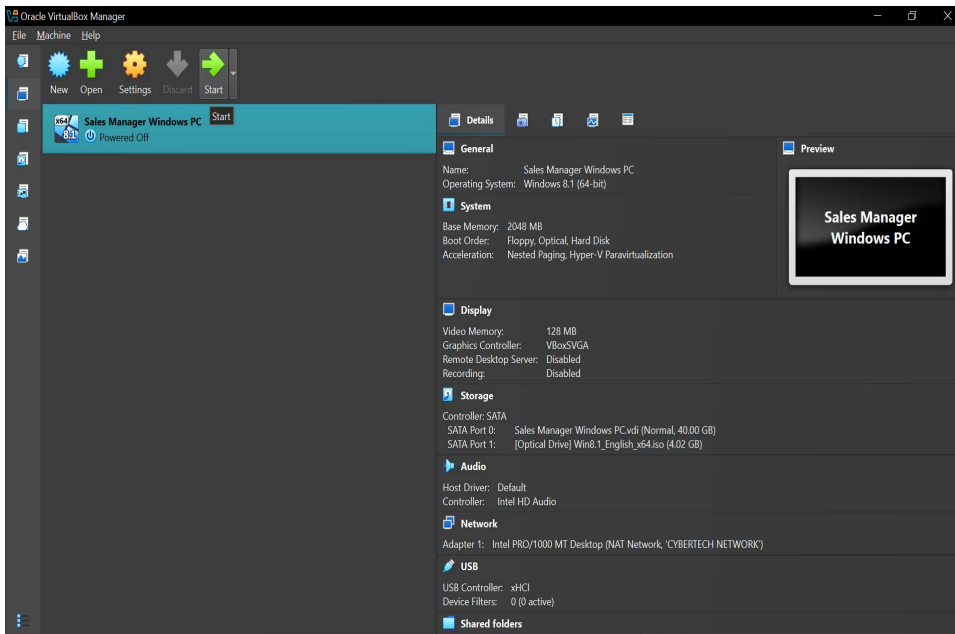

forom the drop down "specify virtual hardware"....

set the Memory Base to 2048MB and number of CPUs to 1

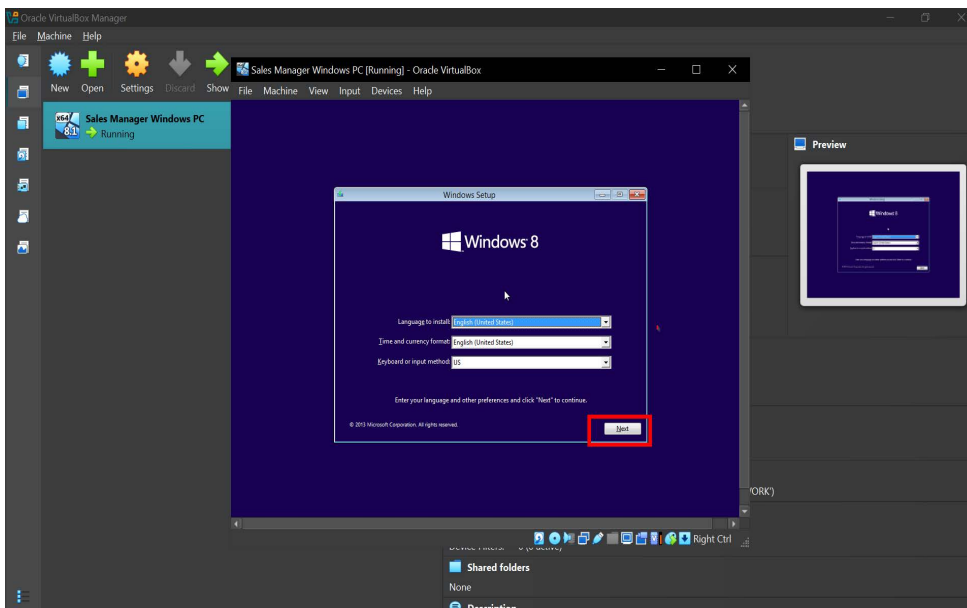

From the drop down "specify virtual hard disk" leave the disk size at 40GB

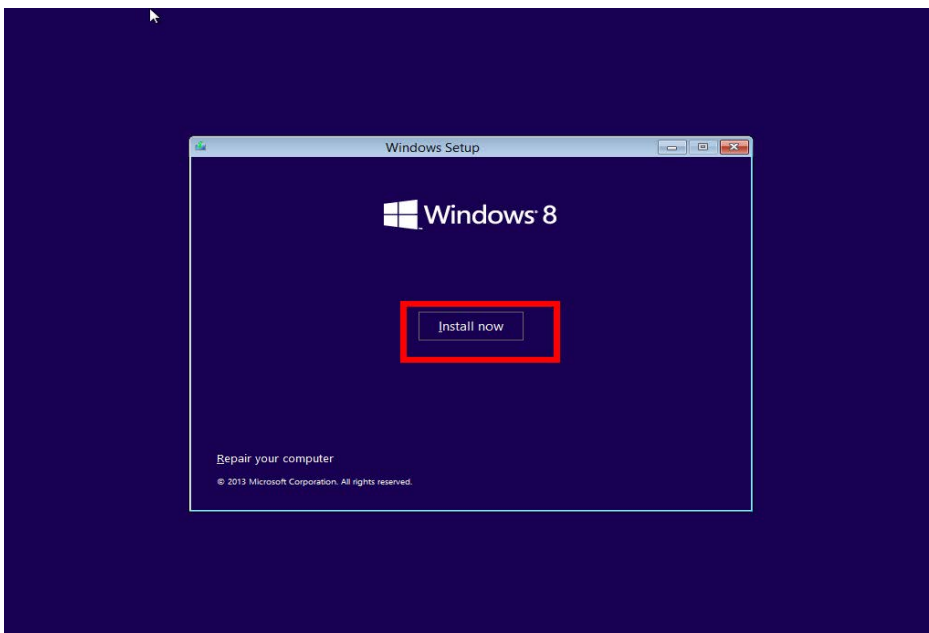

Then click 'Finish'

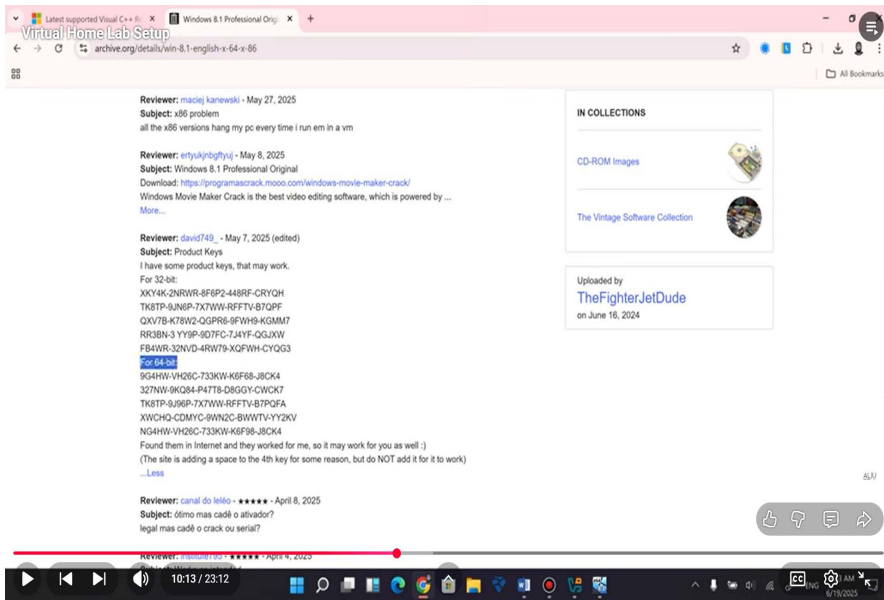

Hover on the "sales manager Windows PC" then click start
