

1. Search for the Windows server on Google.
2. Click the official Microsoft download link shown in the first result.
3. Select the 64-bit edition
4. The download will start automatically, and your browser will indicate progress.
5. Open File Explorer and go to your Downloads folder to confirm the server ISO file has been downloaded successfully.

6. Open Oracle VM VirtualBox Manager from your Start menu or desktop.

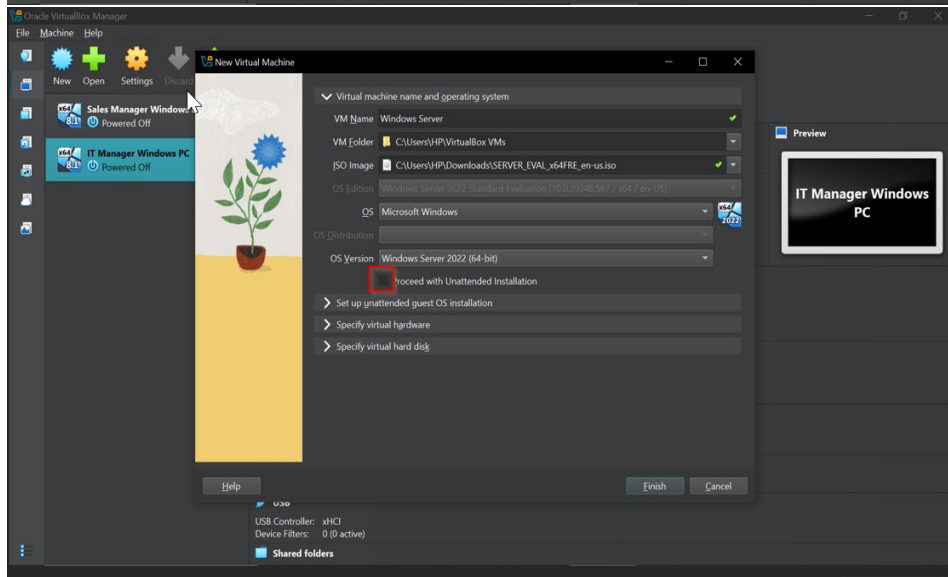

7. On the VirtualBox home screen, click “New” to create a new virtual machine.

8. Name your virtual machine — in this case, Windows server.

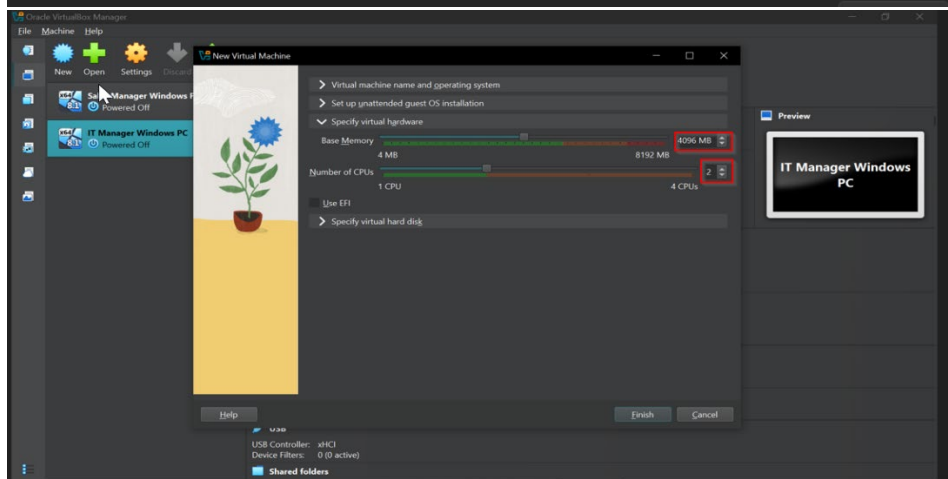

9. Leave the default VM folder path unchanged

10. In the ISO Image section, click the drop-down arrow and select “Other...”.

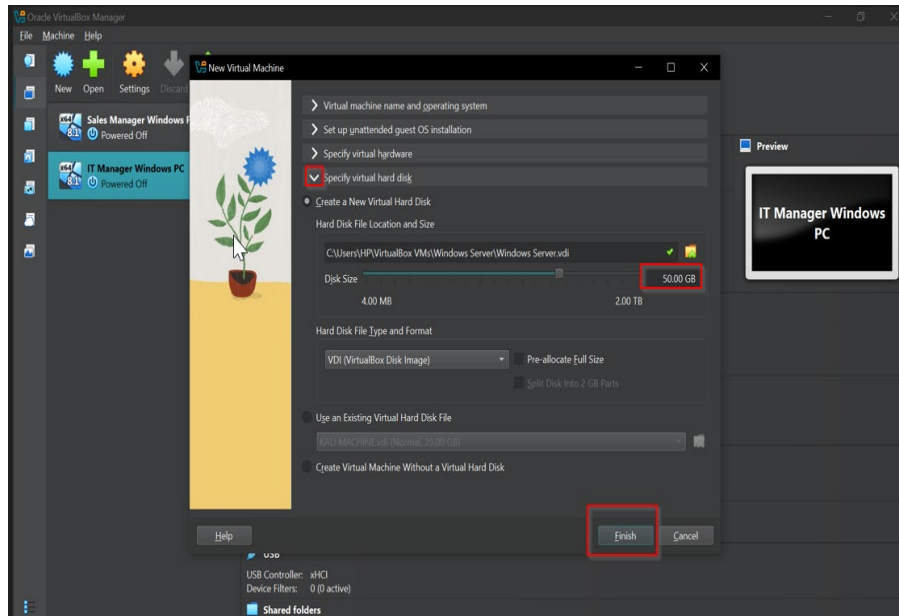

11. Navigate to your Downloads folder and select the previously downloaded Windows server ISO file.

12. Uncheck “Proceed with Unattended Installation”

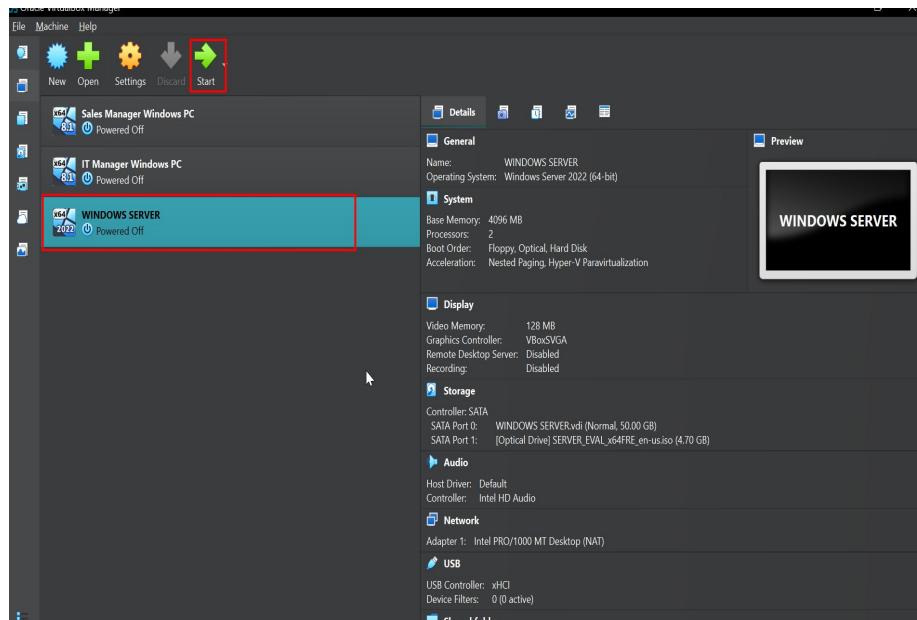

13. Set the base memory and the numbers of CPUs

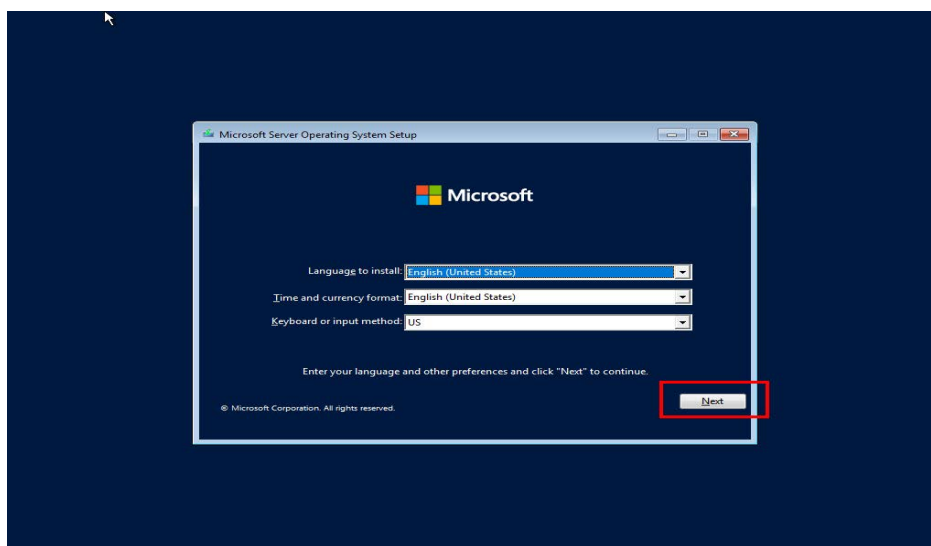

14. Set the virtual hardisk size to 50GB

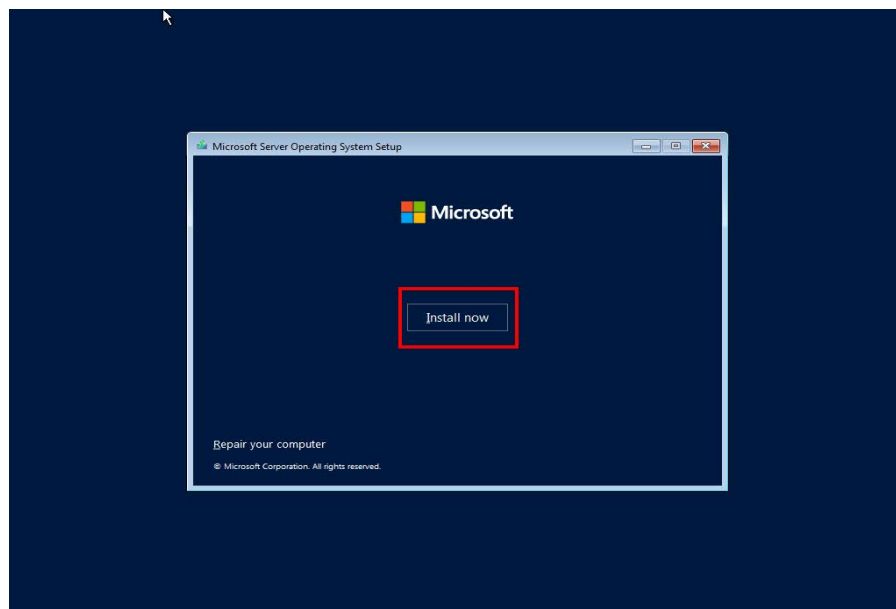

15. Click “Finish”

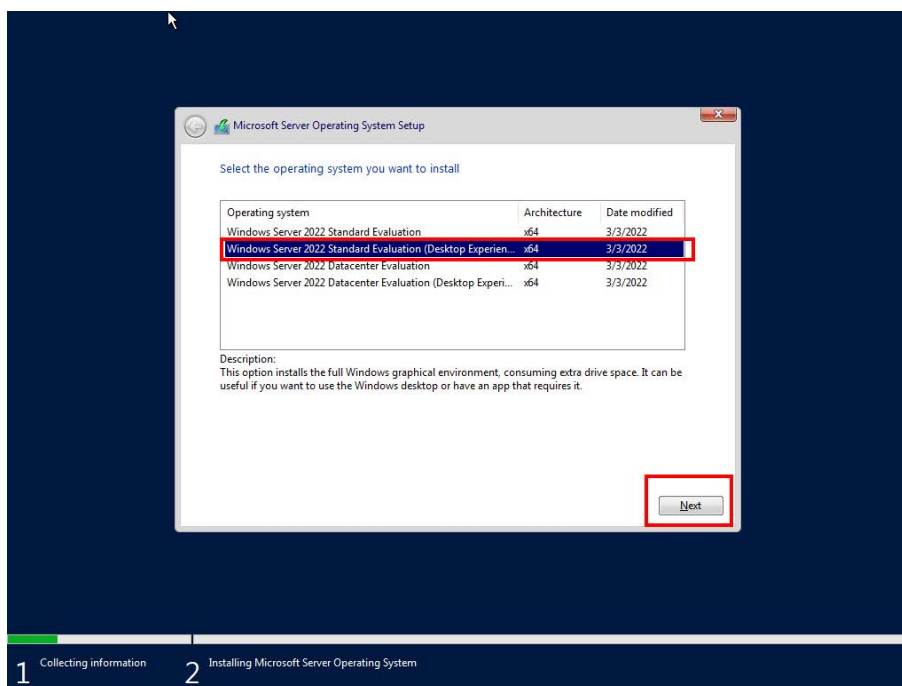

16. Click the green “Start” button at the top to boot up the WINDOWS SERVER

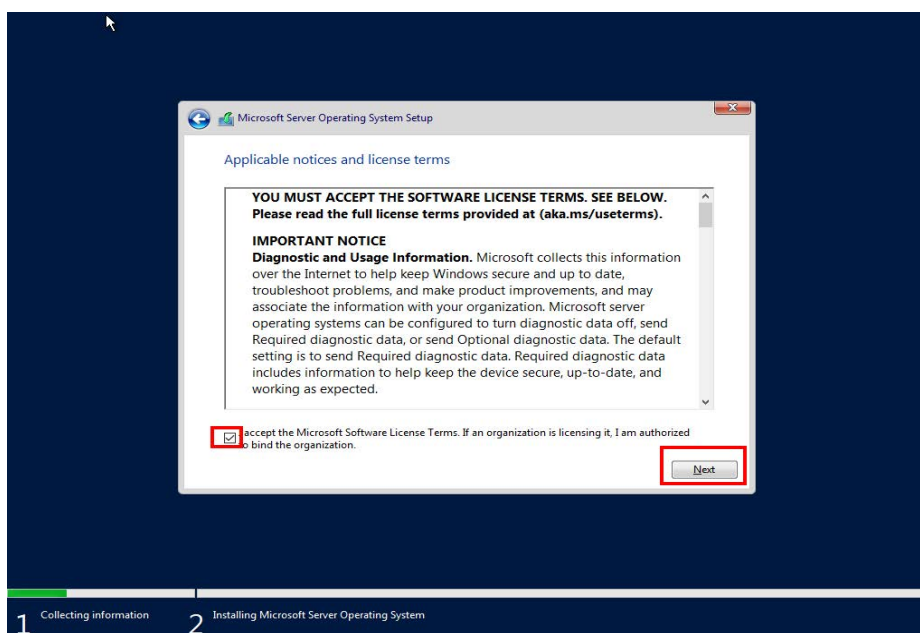

17. CLICK NEXT

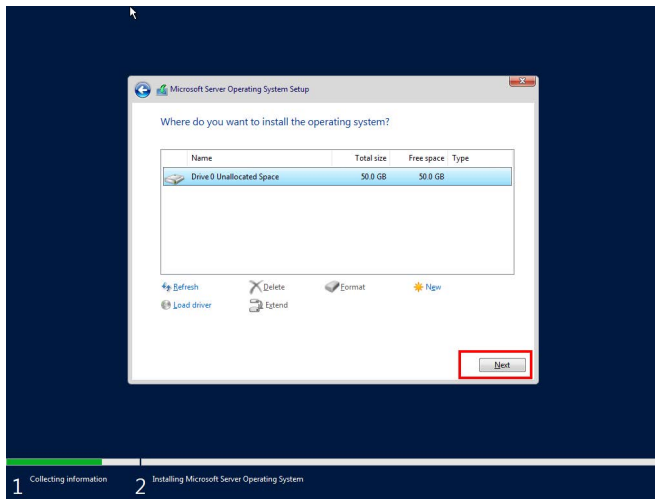

18. click install now

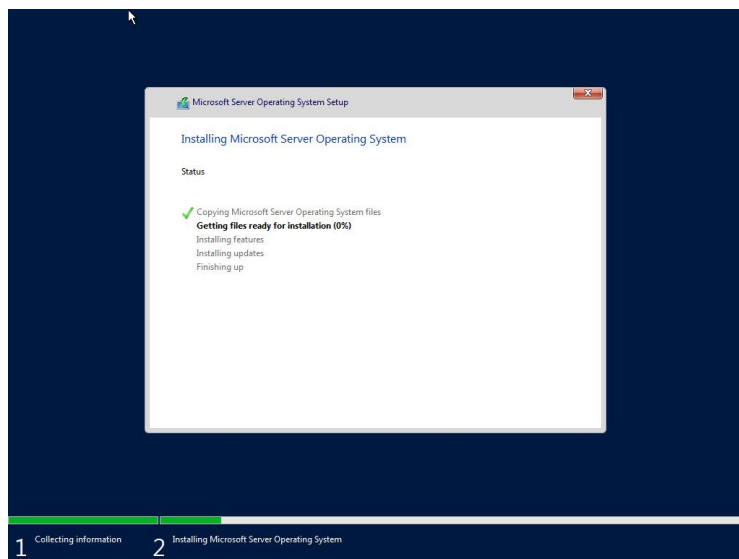

19. Choose the windows server desktop experience

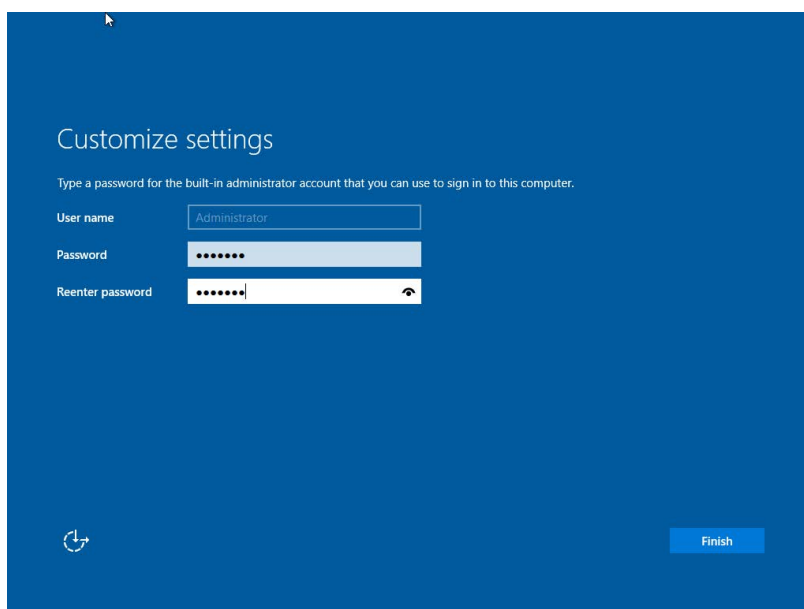

20. tick accept and click next

21. click next

22. allow installation to finish up

23. set your password

24. that it.....your windows server is set
